The all-in-one platform for trusted activities

Present your ID in seconds

Prove your age and identity for administrative duties, legal checks or leisure activities.

Digitally sign documents

Give your electronic documents the same legal value as a printed and signed paper.

### Manage privacy & consent

Choose which personal data you share and manage your history of consents.
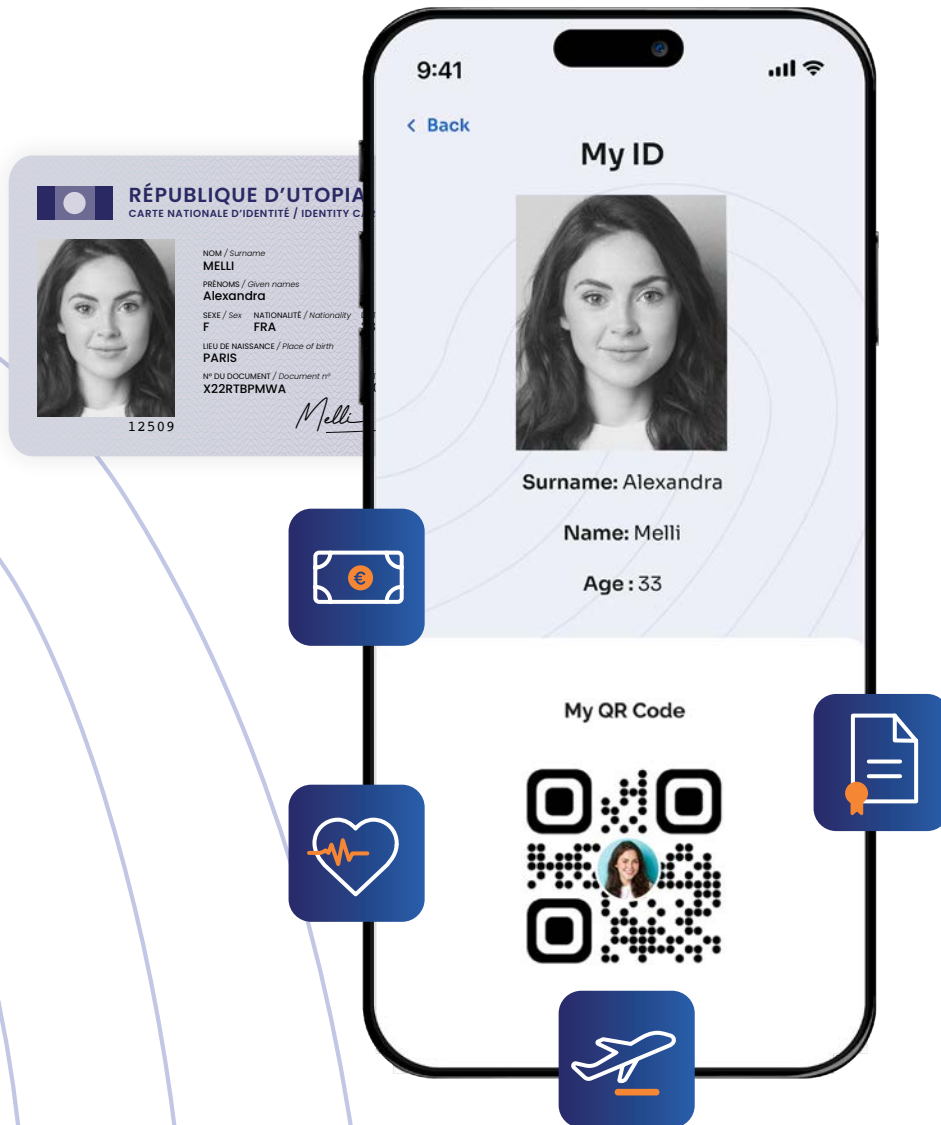

Share proofs of identity

Replace document scans with trusted single–use credentials.

Connect to thousands of services

Access to private and public services without filling forms and creating new passwords.

How does it work?

1

Verify your ID. Once.

Wallet activation via official ID card, passport or public registries.

2

Enrich it

Add attributes from trusted sources like bank, corporate or social accounts.

3

Unlimited Use

Identify to government and business services. Online & offline.

ID Wallet by iDAKTO, the cornerstone of your country digital services
